

# Oval Filters

Designed to Perform . . . Built to Last!

## Introducing Oval Replacement Filters!

PROAIRSUPPLY proudly introduces oval filter elements as replacement filters for your Donaldson® Downflo® Oval Dust Collector. PROAIR's new oval replacements are available in Cellulose Blend or Nano fiber media offering you quality and performance based on your application.

### Nano fiber–Oval with MERV 15 Efficiency

PROAIRSUPPLY now offers Nano fiber filter media with its unique technology offering key benefits of **higher efficiency, lower pressure drop, longer filter life and greater energy savings**. PROAIR's selection of high-quality blended base media and consistent Nano fibers has created a durable product which not only withstands rigorous pulse-cleaning, but also offers extended filter life, lower operational costs and Merv 15 operational efficiency. PROAIR's Nano fiber–Oval elements feature **nanofibers that are 50% finer than OEM** and a MERV 15 efficiency rating, the industry's highest. Nano fiber technology in your dust collectors means **superior filtration efficiency on sub-micron particulate** (0.3 to 1.0 micron dust particles), lower emissions, longer filter service life and greater energy savings.

**OPTIONS: Cellulose Blend, Nano Fiber, FR Fire Retardent, Spunbond**

## Features

- Galvanized End Caps
- Expanded Metal or Band Outer Construction
- Expanded Metal Cores
- Operating Temperatures up to 275°

## Benefits

- Excellent Filtration Efficiency
- Increased Air Flow With Unchanged Velocities
- Extended Filter Life
- More Effective Pulse Cleaning
- Reduced Maintenance Costs & Downtime
- Reduced Abrasion

## TYPICAL APPLICATIONS

Chemicals and Plastics

Food Processing

Foundry

Grain, Agriculture and Feed

Metal Working

Mining and Rock Products

Weld Fume
